

RABBIT

Rabbits were brought to the UK by the Normans!

Statistics

Size: Body Up to 40cm
Tail 5-8cm
Weight: 1.2-2kg in spring
Males are bigger!

Family Groups

Rabbits live in social groups.
Maybe 2, or up to 30.

Active Time

Rabbits are active by night, especially at dawn and dusk. Sometimes they come out in the day!

Diet

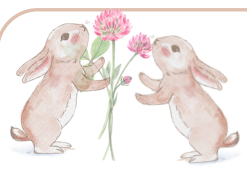

Rabbits eat various plants: grasses, cereal crops, root vegetables and young plant shoots. In winter, they eat tree bark!

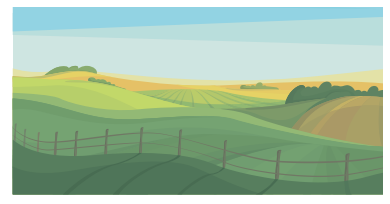

Life

Rabbits can live for up to 3 years!
Most do not live more than 1 year.

Females give birth to 3-7 kittens every month, from March to August

Habitat & Home

Rabbits live in the woodland, farmland, grassland, sand dunes and even gardens.

Rabbits live underground in a warren, in connecting tunnels and resting chambers.

Entrance holes are 8-20cm wide.
