

RED DEER

Red deer have large, branching antlers. Every spring they fall off and a new set grows back.

Statistics

Size: Up to 200cm

Weight: Males 90-190kg

Females 63-120kg

The largest deer in the UK!

Herds

Male and female deer live in separate herds. They mix together in the autumn.

Nocturnal?

Deer are most active at dawn and dusk. They feed more at night if humans are about.

Diet

Deer eat grass, heather, leaves, berries, nuts, tree bark and plant shoots.

Life

Red deer may live up to **20** years! Females give birth to one calf in May- July.

Rut

Males fight each other in the autumn to win control of the females. They lock antlers and push. They bellow and roar.

Habitat

Woods, forests, moorland, hills, grassland, parks

Rest

Deer sleep on the ground, hidden in thick bushes or bracken. Sometimes they rest in the shade of a tree.
