

Instructions

Mammal Signs Research

1. Print the 4 Mixed Animal Signs: Skulls, Tracks, Poo & Nests
2. Print the 'Blank' sheets for each animal, enough to give one to each child or group of children.
3. Put the Mixed Animal Signs around the room and hand out the Blank sheets, asking the children to research the signs for that animal.
4. The children can collect the information and write notes or draw pictures on the Blank sheets.
5. At the end, ask the children to make a presentation about the field signs left by the animal, which they have been studying. 
6. Look at the Mammal Youth Hub. There are short videos and more resources about these mammals.
